

# PEC PULSE - L SERIES FUEL DISPENSER

Powered by modularity, driven by smart electronics and Data Centre for remote operational views, the PEC PULSE range is a perfect match for your forecourt.

PEC Fuel Systems recognises that today's market requires a modern fuel dispensing range that is streamlined and yet extremely flexible to suit any forecourt size and budget.

Letting customer insights take us to new places

LS 4-Prod Dispenser

LX 5-Prod Dispenser

## GALLAGHER DATA CENTRE BRINGS VISION TO EVERY DISPENSER

Changing the game is not about taking risks, it's about taking on technology from a reliable, leading industry player, that advances the industry, has positive business benefits and is a platform for the future.

All PULSE products are, or can be Data Centre enabled. Securely connecting them to the Data Centre via the internet, allows vision on your phone, tablet or office PC.

Any new site build or site enhancements must consider the Data Centre first as a through life management plan for dispensers.

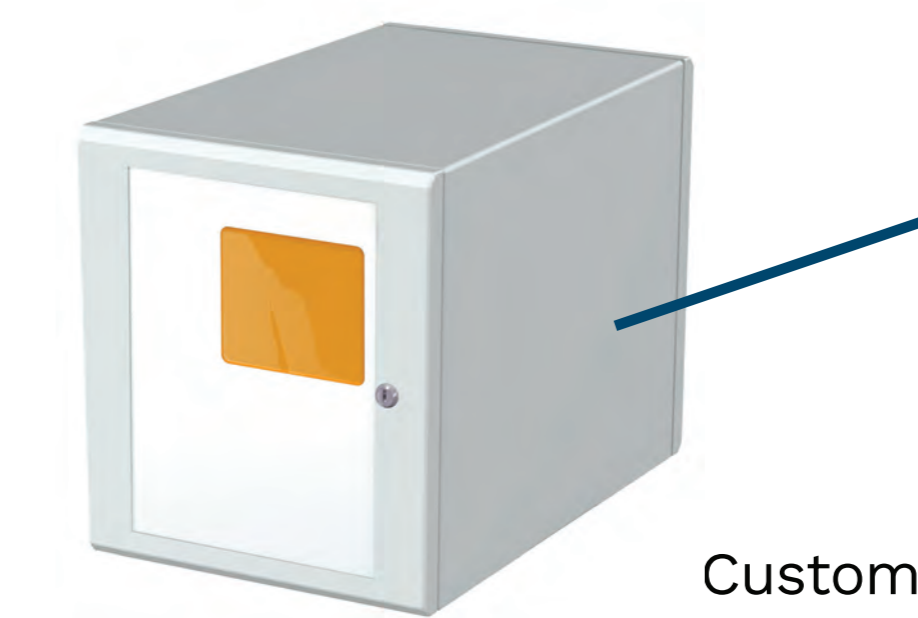

- Every pump/hose has 24/7 intelligent sensing with dynamic status and email alerts
- Every dispenser can be accessed remotely – reducing site visits in multiple ways
- Service contracts can now be built around Data Centre on fact based 'site-wide' servicing

## THE WORLD'S MOST MODULAR FUEL DISPLAY LAYOUT IS HERE

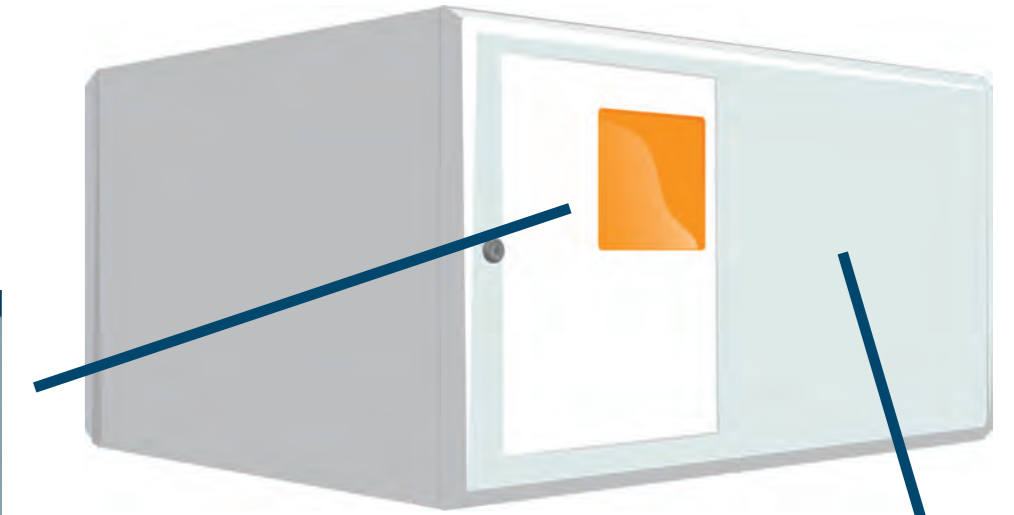

The displays allow for customisable imagery, text or numerals. The choice is yours.

**Smaller**  
Fuelling User Interface (FUI)

Customisable vinyl for 7 price displays, grade labels, your brand and preset positions.

**Larger**  
Enhanced User Interface (EUI)

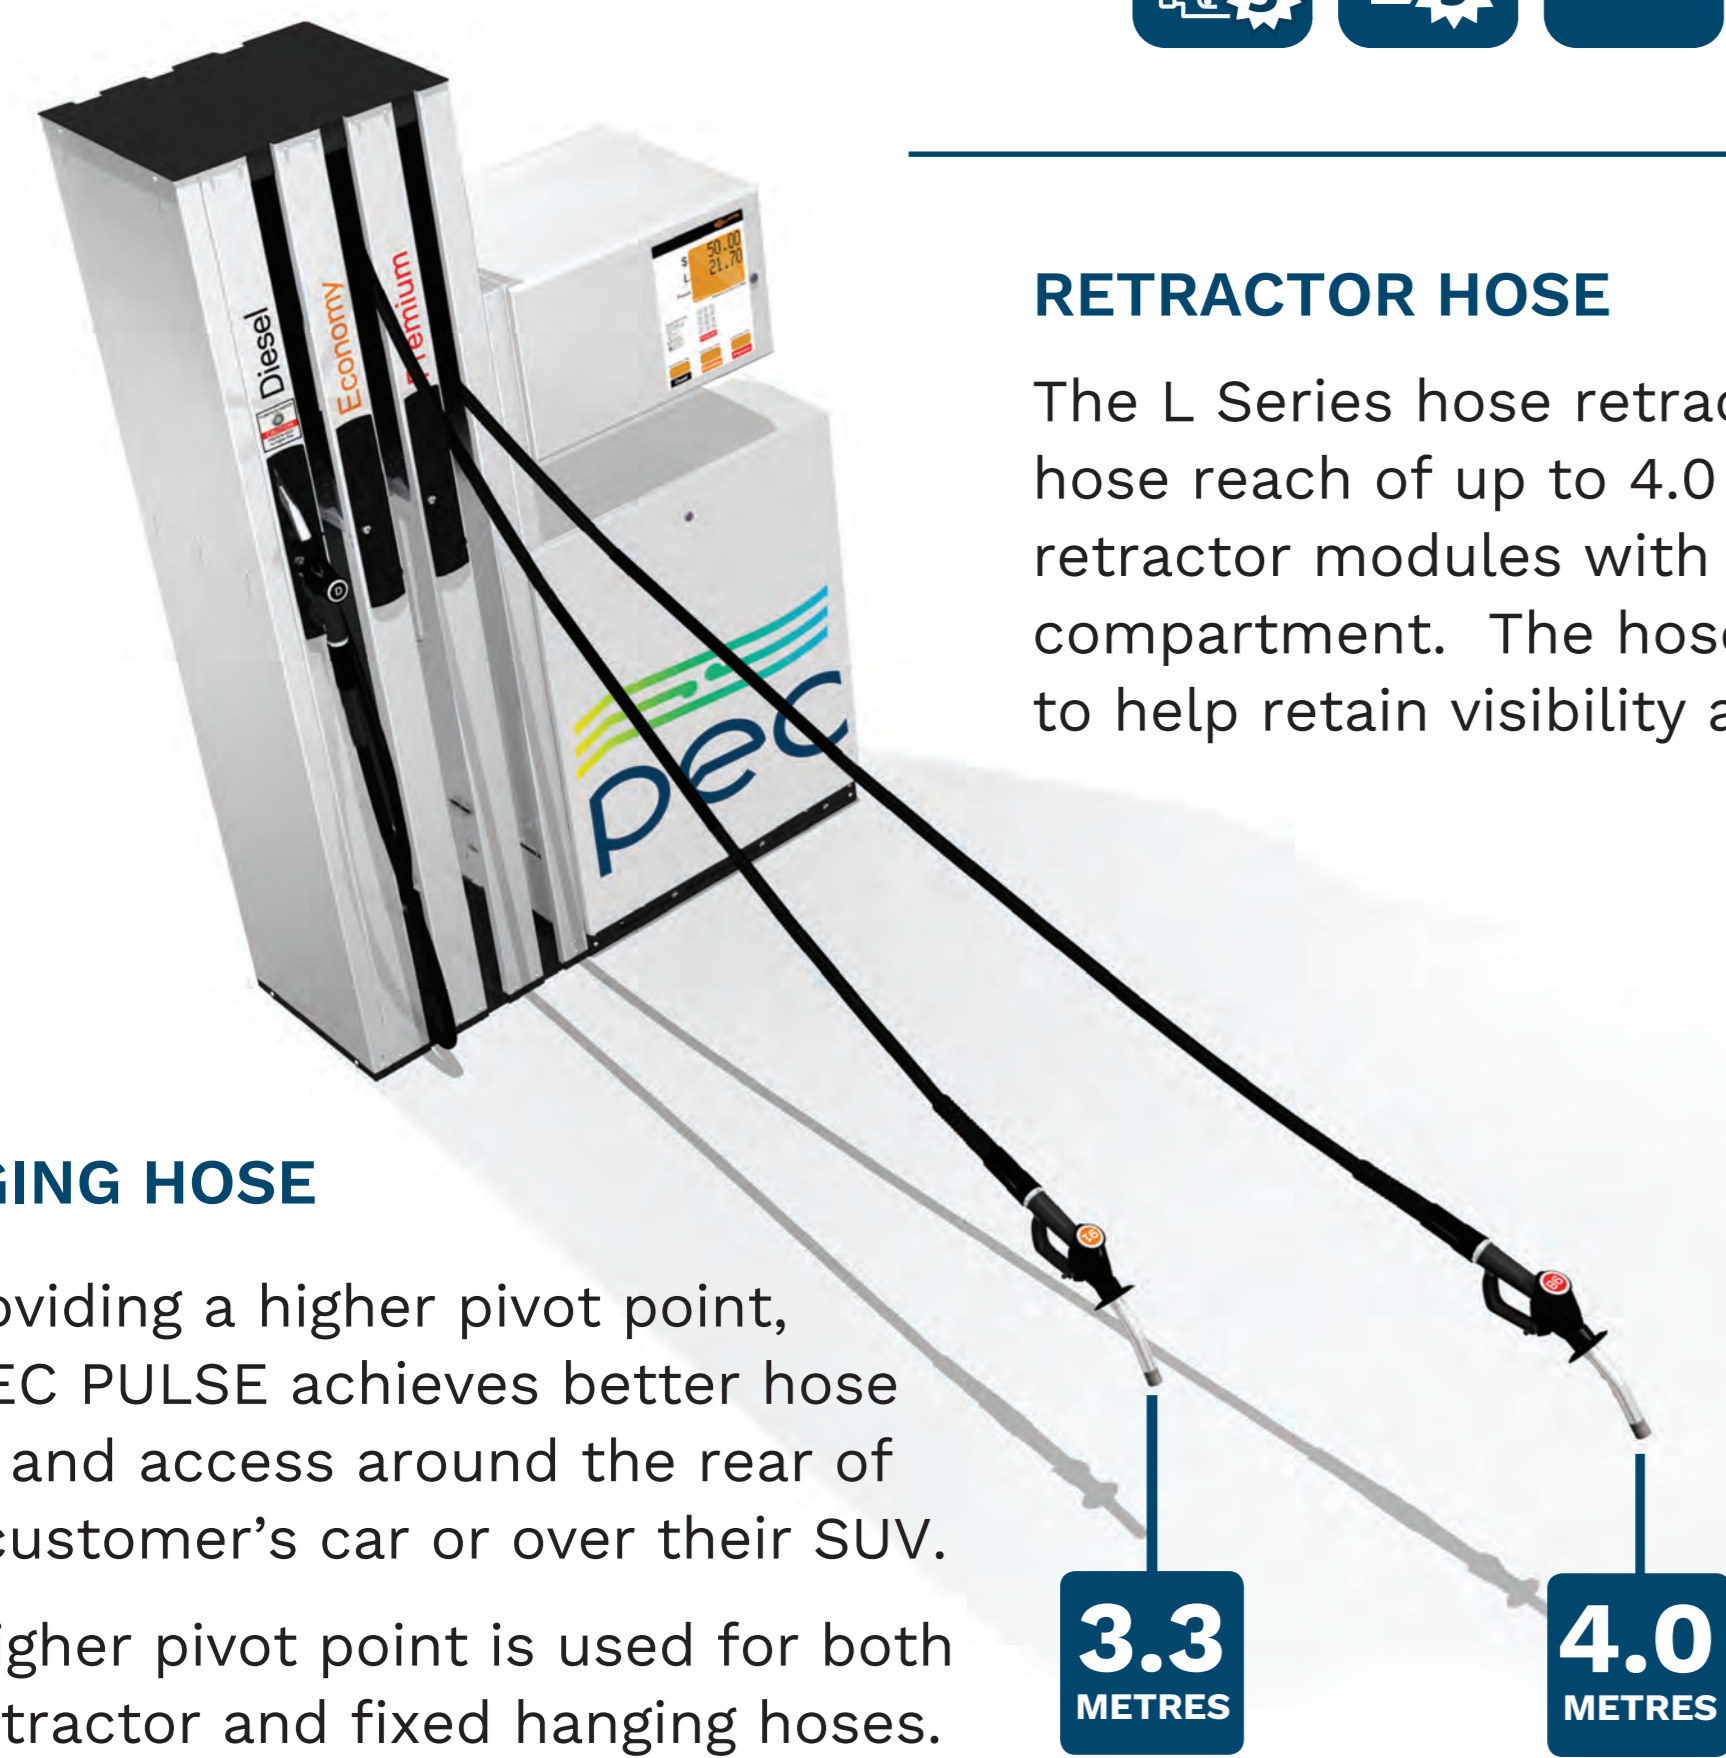

Enhanced UI - with blank metal, brand space.

Advert UI - promotional page changed manually.

Media UI - PC & media screens with sound.

Dedicated Grade UI - Each hose or hose choice has a display.

Payment UI - our safe zone can take commonly used payment terminals.

## RETRACTOR HOSE

The L Series hose retraction system ensures a hose reach of up to 4.0 meters. You can mix the retractor modules with hanging units in a hose compartment. The hose module has offset slots to help retain visibility across the forecourt.

## HANGING HOSE

By providing a higher pivot point, the PEC PULSE achieves better hose reach and access around the rear of your customer's car or over their SUV.

The higher pivot point is used for both the retractor and fixed hanging hoses.

Hose reach is important, just ask your customers

## HOSE AND NOZZLE OPTIONS

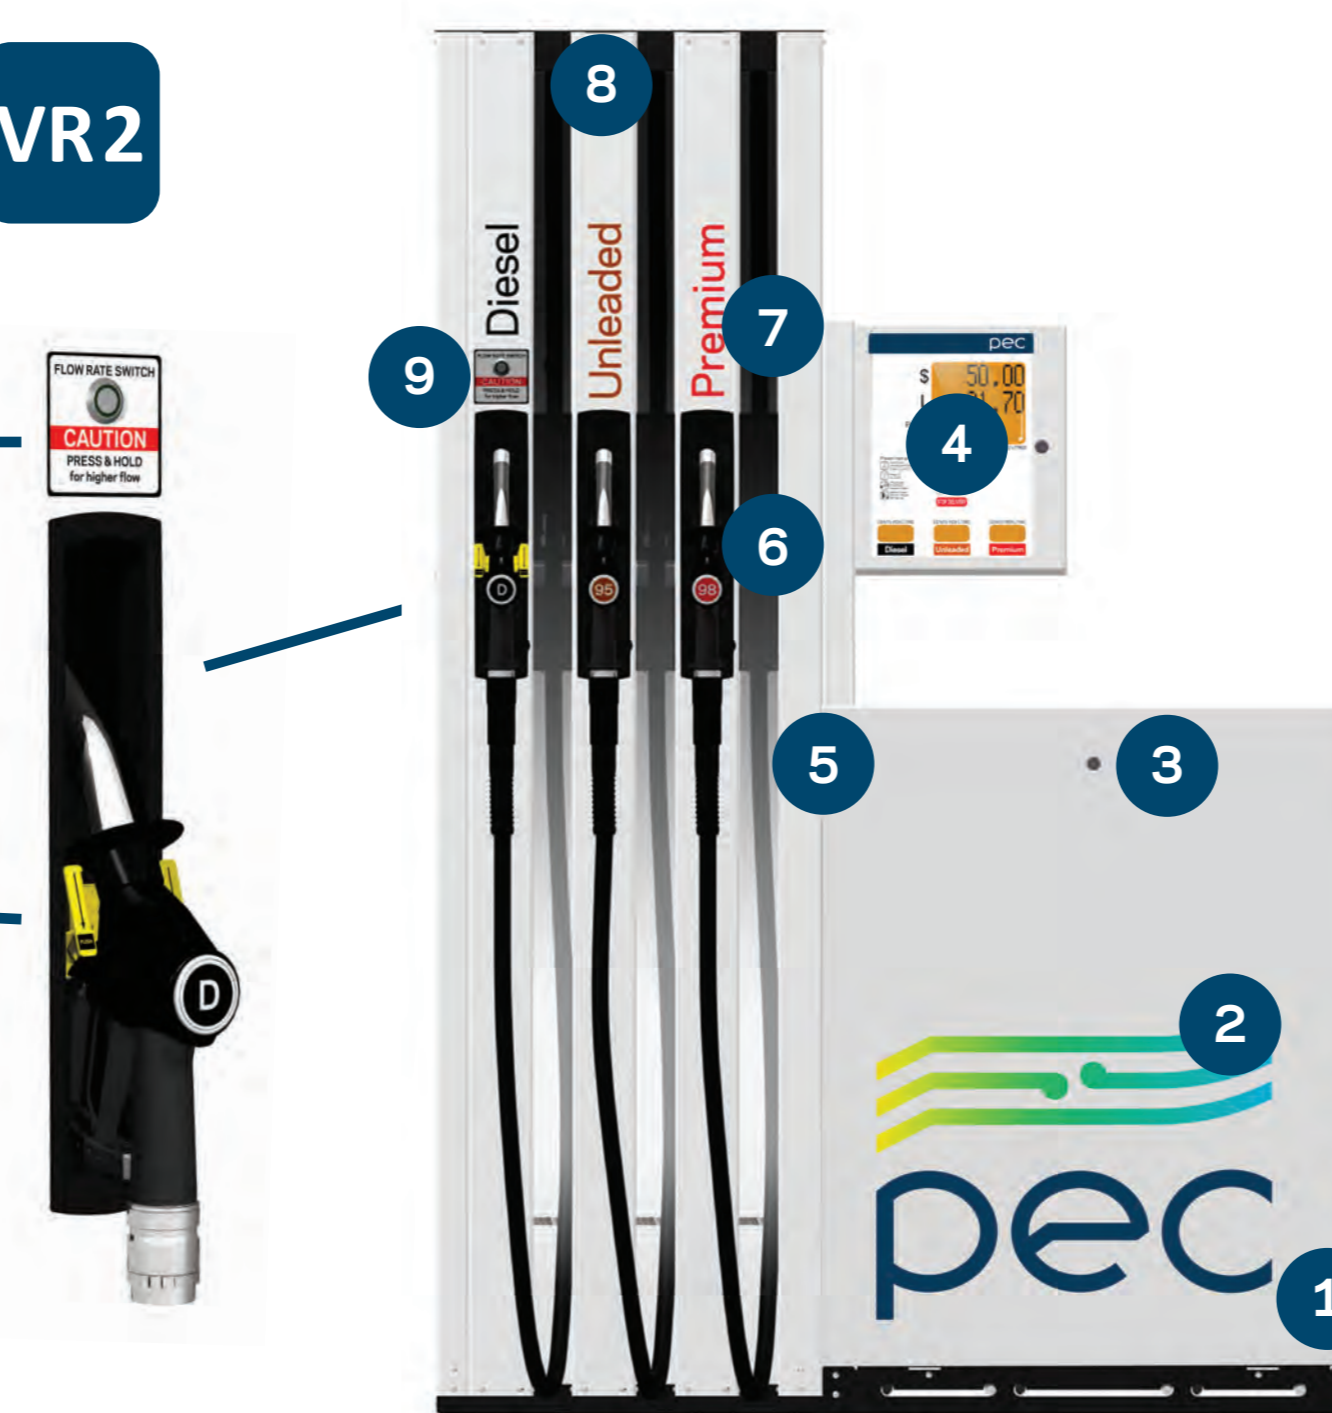

### FASTER FLOW DIESEL

A boosted flow rate is activated with the simple press of a button.

### GRADE CONFIRMATION LATCH

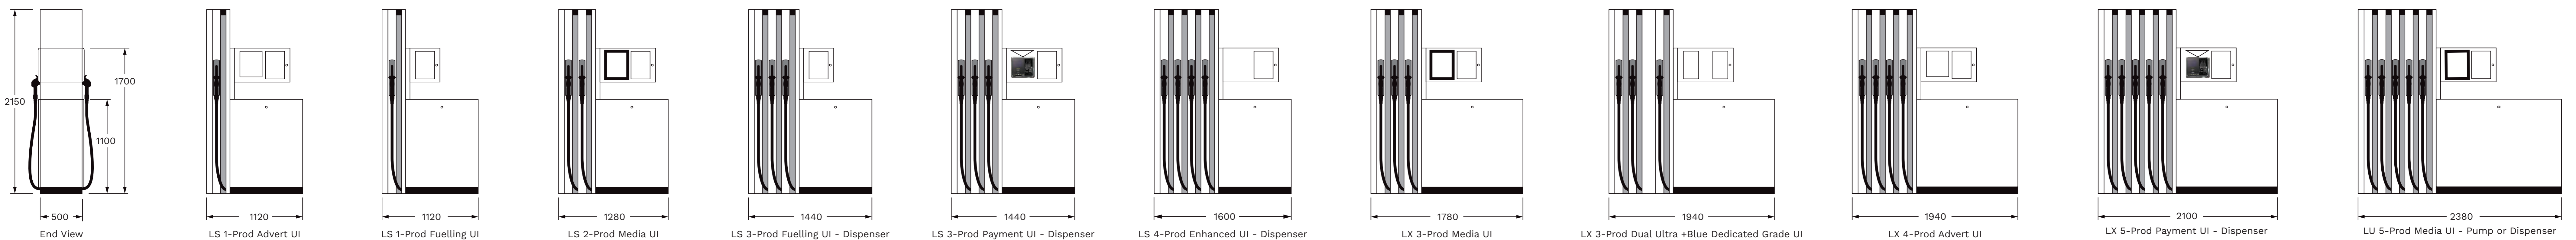

**GRADE CONFIRMATION FLAP**  
Optional for +Blue or Diesel as additional misfuelling deterrent.

## MULTIPLE FEATURES MAKING THE PEC PULSE L SERIES A LEADER IN ITS FIELD

- 1 Pressure fed, suction and mixed models available.
- 2 Highly accurate Tatsuno meter with 3 year warranty.
- 3 5 year corrosion protection warranty on all exterior panels.
